

The
power to
control

Custom-made controllers UV disinfection controller

Project description

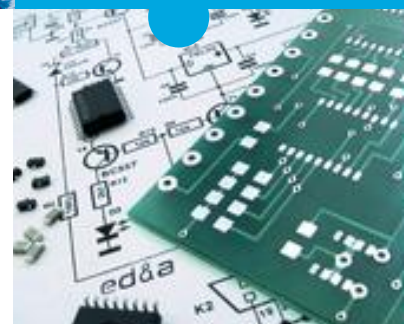

This customer's UV disinfectant applications are used mainly in the food industry, in hospitals, in the chemical industry, for wastewater purification, etc..

E.D.&A. has been supplying "standard custom-made" controllers for this customer's more large-scale projects for some time. For the smaller pieces of equipment, which were fitted with electronics that were at risk of becoming obsolete, the customer needed a new controller concept.

A custom-made controller was developed for the market for small and medium-sized appliances.

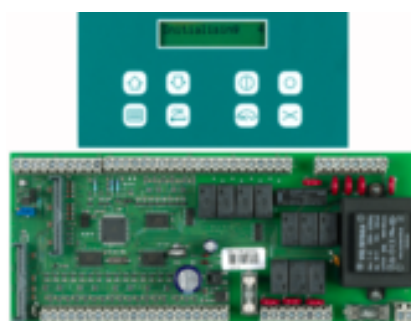

Customer

Organisation that develops and produces disinfection equipment based on complex ultraviolet (UV) light technology.

Characteristics

- custom-made front panel
- MODBUS RTU communication
- digital and analogue I/O
- single chip microcontroller
