

The  
power to  
control

# Custom-made controllers

## Vacuum packaging machine controller

### Project description

The packaging machines are available in sizes from a small table model to machines with double vacuum chambers. These machines are used above all to pack fresh food products.

The controller, with both digital and analogue inputs and outputs, regulates the entire vacuum packaging and sealing process of this appliance.

### Intuitive operation

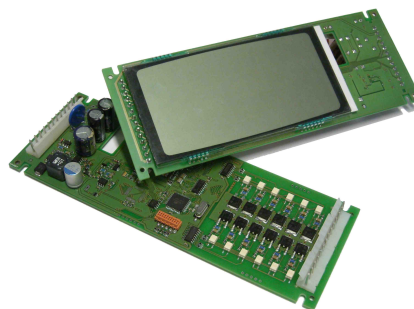

Our customer wants to demonstrate their innovation with these new controllers by the greater intuitive operation of the appliance. E.D.&A. developed a customised LCD display with clearly recognisable symbols to meet this requirement.

### Customer

A specialist in development and production of vacuum packaging machines.

### Characteristics

- surge protection for triac outputs
- custom-made 64 segment display, display area 70 x 40 mm
- keyboard with 8 keys, can be expanded to 16 keys
- power supply from 18V to 30V AC 50/60 Hz
- operating temperature: -10°C to 50°C
